

Energetic support with concentration problems

'Children of the New Age' often suffer from concentration problems. On the one hand, this can be associated with strong daily over-stimulation, on the other hand, their senses are much more sensitive than those of adults. Many of them display signs that they could become mediums, feeling and seeing more than is good for them. It is hard for them to focus on the mental level and concentrate.

According to them, learning by heart, and reproducing teaching material, does not make much sense, which complicates the learning process.

The angelic world provides a subtle-spiritual energy frequency in the form of the **Angel Aura Essence "Angel Korathel"**. It helps with mental tiredness and stress. Experiences have shown that the mental body is strengthened and re-focused.

A PRACTICAL EXAMPLE

***Situation:** Gabriele (40) teaches in a Secondary Modern School. She has been working with Ingrid Auer's angel essences for some years. She has also made some attempts with her class. Although the students are in their puberty, they agree with angel symbols and angel essences and even ask for them. One day, Gabriele tells them she would like to try out a new Angel Aura Essence, Angel "Korathel". The children immediately agree. After a short time, she notices that on days when "Korathel" has been sprayed in the classroom, the students' results and concentration was noticeably better.*

***Explanation:** The Angel Aura Essence "Angel Korathel" strengthens people's subtle bodies (aura, chakras), especially the so-called mental body.*
