

Energetic improvement of rooms

The amount of energetic support your child needs depends on its situation and the contact it has with those around it, and their problems and fate. Children immediately feel if old emotions are trapped in buildings. Airing the rooms is not enough, in these cases. If you want to improve the energy and increase the vibration in rooms, you could, for instance, use the **Angel Aura Essence "Angel Meditation"**. It includes the energies of eight Archangels.

A PRACTICAL EXAMPLE

Situation: Timo is four years old. His parents have bought a new flat. They proudly show their son the flat. Timo walks into the hall, the living room, his future bedroom, and then he quickly wants to go back to the car. The parents are disappointed, because Timo has been really looking forward to his new home. They wonder whether they have done something wrong.

Explanation: Timo is very sensitive and immediately notices that neither the block, nor the flat have got a "soul". The block of flats was built by a building company for purely commercial reasons. Spraying the Angel Aura Essence "Angel Meditation" in all the rooms, for some time, could help to breathe positive energy into the flat.
